BCGCM3002B

Operate a truck mounted loading crane.

Who is the course designed for?

This course is designed for new entrants to various retail, wholesale, warehousing construction, farming etc. Prior to licensing students cannot be employed as vehicle loading crane operator's.

The course provides a pathway to obtain a vehicle loading crane licence class CV and can lead onto a full qualification in BCG03 General Construction Training Package (Version 4).

Legal limitations or pre-requisites exist on the qualification that may hamper the obtaining of a licence from the licencing authority.

Students can contact the licencing authority for qualification criteria and advice. The contact phone number for WorkCover NSW is 131050.

What does the course offer?

The program has been organised to provide students with general skills, background information and specific knowledge about operating a vehicle loading crane, which is then applied in discussion, questioning, role-plays and practical application for the industry specific unit.

The program is delivered off-the-job at our main training centre in Moorebank NSW (or various other locations) and/or on-the-job at the clients premises. Training delivery combines face-to-face trainer led theory classes and practical sessions involving small group and individual activities including peer critical evaluation scenarios, questioning, role-plays and simulations.

Candidates are provided with a training manual that covers all parts of the course. Additional material will be made available during training sessions if required.

How are students assessed?

Students will undergo a theory and practical test.

The theory test requires the completion of 68 questions within 60 minutes. It is a closed book test and no outside assistance is allowed. Groups can sit for the test at one time providing there is sufficient separation. The practical test requires the completion of set tasks using a compliant vehicle loading crane within. A written assignment is also required from the Cranes Assessment Instrument.

If a student has problems with written English the theory test may be given orally, but arrangements must be made at time of booking.

Checklist for clients prior to assessments

Compliant Vehicle loading crane and Assessment Area (if conduct on-site).

- Vehicle loading crane is in safe operating condition and complies with the requirements of the

jurisdiction within which the training/assessment is taking place.

- You have the ability to sling loads to and from the vehicle. If these slings have not been selected by a competent person as being suitable type and capacity then you will be required to hold a dogging (DG) licence prior to this assessment.
- You will need to ensure that sufficient space is available for manoeuvring. The surface must be hard and level.
- It is important that suitable loads are available.

Individual Requirements

- Students must have completed the following pre-requisite unit " BCGCM1001B " Follow OH&S policies and procedures.
- Students must be at least 18 years of age.
- Students should present training records, such as a log book as evidence of any further on-the-job training.
- PPE appropriate to your work site (or if at the training centre long sleeve shirt, pants and your work boots) must be brought to the assessment.

Special notes:

This course does not provide a 'licence'.
