

1300 789 606

Equipment Operator 'Refresher Training'

Who is the course designed for?

This course is designed for existing licensed operators.

In some cases the refresher course can lead onto a full qualification in Transport and Logistics (TL107).

Refresher sessions are generally 3.5 hours for groups of up to 6. However duration and trainee numbers can be tailored to suit workplace needs.

Students or Supervisors can contact our office on 1300 789 606 for further information.

What does the course offer?

The program has been organised to provide students with general skills, background information and specific knowledge about operating various equipment, which is then applied in discussion, questioning, role-plays and practical application for the industry specific unit.

The program is usually delivered on-the-job at the clients premises so as to gain most impact for matching skills with equipment that is currently in use. Training delivery combines face-to-face trainer led theory classes and practical sessions involving small group and individual activities including peer critical evaluation scenarios, questioning, role-plays and simulations.

Candidates are provided with a training manual that covers all parts of the course. Additional material will be made available during training sessions if required.

Refresher courses are available for:

- Various types of forklift.
- Order Picking Forklift and Turret Truck.
- Various types of Elevating Work Platform and boom lift.
- Vehicle Loading Crane.
- Skid Steer Loader
- And more...

How are students assessed?

A theory challenge assessment is conducted as part of the training session. However practical competency assessments are available as an option to add on to the refresher training course.

Checklist for clients and students prior to training

Compliant equipment and training/assessment Area.

- Equipment is in safe operating condition and complies with the requirements of NSW legislation

and Australian Standards.

- You have the ability to lift or reach to various locations including maximum height/reach.
- Where required, Fall Arrest Devices are on hand, inspected as serviceable and in date.
- You will need to ensure that sufficient space is available for manoeuvring and that the area is hard and level..

Individual Requirements

- Students must hold a current license for that type of equipment and bring it on the training day.
- PPE appropriate to your work site (or if at the training centre long sleeve shirt, pants and your work boots) must be brought to the assessment.

Special Notes:

A certificate of attendance is issued for attending the training. A certificate indicating competence is issued where competency assessments are carried out. Competency assessments also include individual reports back to management.
